Why you need this treatment...?

01

In today's stressful living, Alopecia (Hair Loss) is a common problem that affects men and women

02

A lot man factors contribute to it, including hormonal imbalances, stress, nutritional deficiency, genetic conditions etc.

03

Current scope of treatments include topical medications that have to be consumed indefinitely

04

Hair transplant surgeries too are not highly popular because of post surgery problems

05

Regenloop GFC Therapy offers you proven results in limited number of sessions as decided by your doctor

What is Regenloop therapy

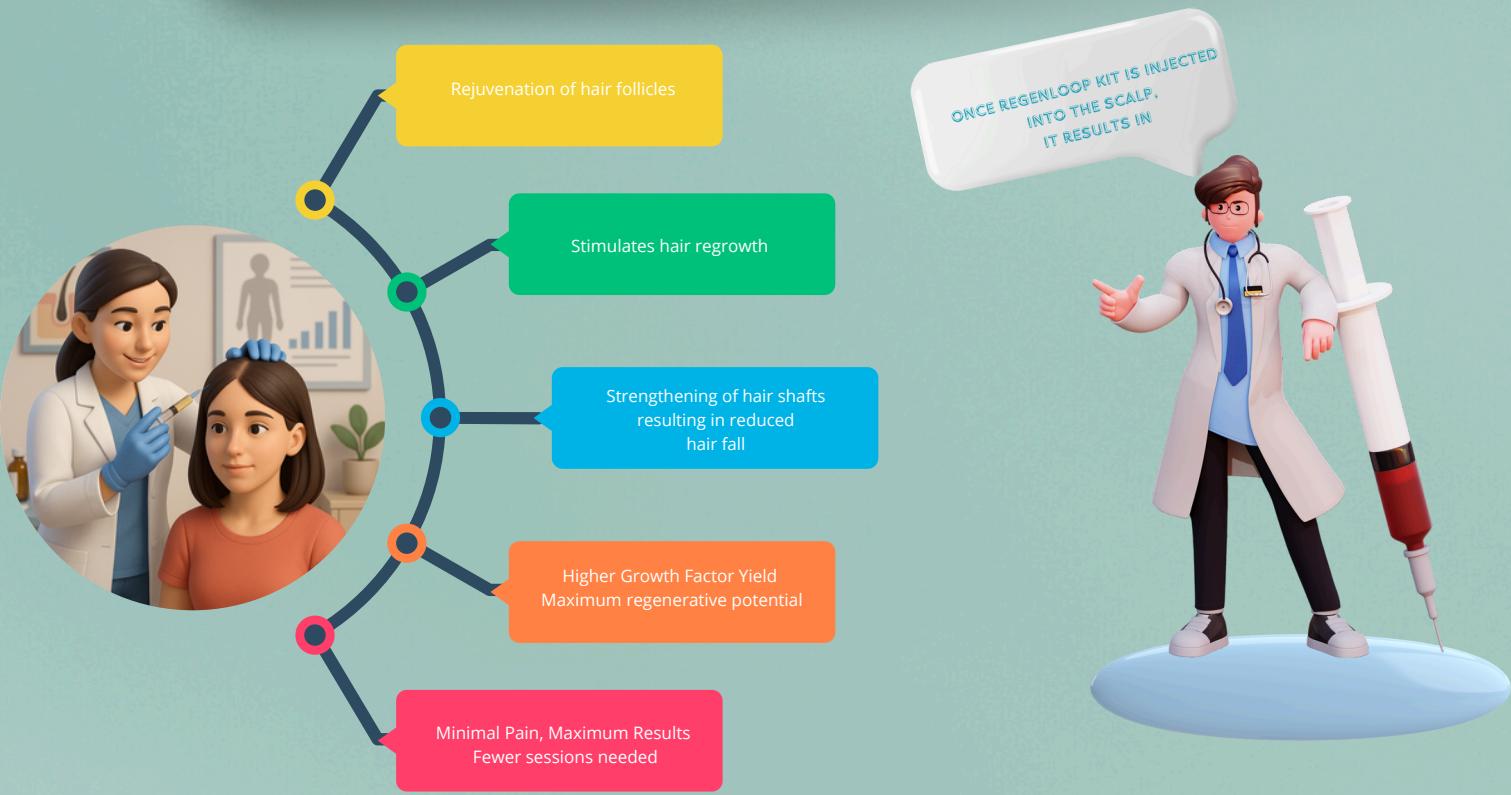

Regenloop GFC is pure, highly safe engineered from your own blood for superior results in hair loss

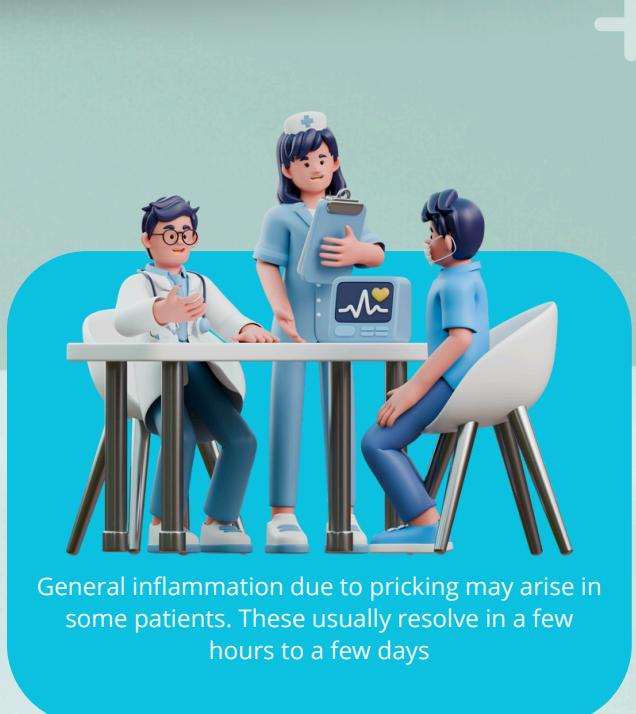

it helps with hair fall reduction, and make hair thicker and fuller in volume

Your blood has growth factors stored inside platelets (type of cell in our blood) which scientists have been able to extract as GFC in specially designed kit

+ How REGENLOOP GFC Therapy + benefits you?

+ What are the possible Side effects?
